

USER INTERFACE DESIGN

EXPERIMENT 10

NAME: K L Laleeth kumaar

REG NO: 240701286

AIM:

To create data visualizations such as Pie Chart and Bar Graph for an Inventory Management System using HTML, CSS, JavaScript, and Chart.js.

PROCEDURE:

Step 1: Creating the HTML Structure

Created an HTML page containing:

1. Heading – Inventory Stock Dashboard
2. Canvas for Pie Chart
3. Canvas for Bar Graph
4. Included Chart.js library for generating charts.

Step 2: Styling the Page using CSS

Applied CSS styling to improve the appearance of the dashboard:

- Light gradient background
- Center aligned heading
- Styled chart containers
- Rounded corners
- Box shadow effect
- Responsive layout

Step 3: Adding JavaScript Data

Defined inventory stock data for different categories:

- Mobiles – 180
- Fashion – 130
- Groceries – 220
- Furniture – 90
- Books – 140

Step 4: Creating Pie Chart

Used Chart.js to generate a Pie Chart showing stock distribution of different product categories.

Step 5: Creating Bar Graph

Used Chart.js to generate a Bar Graph showing stock quantity available in each category.

CODE:

INDEX.HTML:

```
<!DOCTYPE html>

<html lang="en">

<head>

<meta charset="UTF-8">

<meta name="viewport" content="width=device-width, initial-scale=1.0">

<title>Inventory Dashboard</title>

<script
src="https://cdnjs.cloudflare.com/ajax/libs/Chart.js/4.4.1/chart.umd.js"></script>

<style>

body{

font-family: Arial, sans-serif;

text-align:center;

background: linear-gradient(to right,#dbeafe,#eff6ff);
```

```
margin:0;

padding:20px;

}
```

```
h1{

color:#1e3a8a;

margin-bottom:30px;

}

.container{

display:flex;

justify-content:center;

gap:30px;

flex-wrap:wrap;

}
```

```
.chart-box{

width:500px;

height:400px;

background:white;

padding:20px;

border-radius:25px;

box-shadow:0 5px 15px rgba(0,0,0,0.1);
```

```
)

canvas{

width:100% !important;

height:100% !important;

}

</style>

</head>
```

```
<body>

<h1>Inventory Stock Dashboard</h1>

<div class="container">

<div class="chart-box">

<canvas id="pieChart"></canvas>

</div>

<div class="chart-box">

<canvas id="barChart"></canvas>

</div>

</div>

<script src="style.js"></script>
```

```
</body>
```

```
</html>
```

STYLE.JS:

```
const labels = ['Mobiles', 'Fashion', 'Groceries', 'Furniture', 'Books'];
```

```
const data = {
```

```
  labels: labels,
```

```
  datasets: [{
```

```
    label: 'Stock',
```

```
    data: [180, 130, 220, 90, 140],
```

```
    backgroundColor: [
```

```
      '#3b82f6',
```

```
      '#10b981',
```

```
      '#f59e0b',
```

```
      '#ef4444',
```

```
      '#8b5cf6'
```

```
],  
  
borderWidth:1  
  
}]  
  
};  
  
  
// Pie Chart  
  
new Chart(document.getElementById('pieChart'), {  
  
type:'pie',  
  
data:data,  
  
options:{  
  
responsive:true,  
  
maintainAspectRatio:false  
  
}  
  
});  
  
  
// Bar Chart  
  
new Chart(document.getElementById('barChart'), {
```

```
type: 'bar',

data: data,

options: {

  responsive: true,

  maintainAspectRatio: false,

  scales: {

    y: {

      beginAtZero: true

    }

  }

});
```

OUTPUT:

The Inventory Stock Dashboard was created successfully.

- Pie Chart displays stock distribution among product categories.
- Bar Graph displays quantity of stock available in each category.
- Attractive and responsive dashboard interface was created successfully.

RESULT:

Successfully created data visualizations for an Inventory Management System using JavaScript and Chart.js. The Pie Chart and Bar Graph clearly represent stock distribution and available quantity in an effective manner.
